

Compass IAS Academy

ADMISSIONS OPEN

ONLINE PROGRAM · CLASS 8-12

IAS @ School

A civil services foundation for school students — and a way of thinking that serves every child who never sits the exam.

Any board

CBSE, ICSE or State

6 modules

One weekly schedule

Live online

From home, anywhere in India

Two futures. One foundation.

Some students will sit for the civil services examination one day. Every student will need to think clearly, speak with confidence, and understand the world around them.

IAS @ School is built around both truths at once — a multi-year head start on UPSC for the aspirant, and a foundation in reasoning, communication and awareness for everyone else.

Open to all

Class 8 through 12, whatever the student later chooses to become.

Any board

CBSE, ICSE or State syllabus — delivered live, fully online.

Zero clash

Scheduled around school hours and paced down for board exams.

“

**The habit of thinking clearly
is built early — long before it is
ever examined.**

One program, read two ways.

FOR THE ASPIRANT

A head start toward civil services

Civics, constitutional logic, current affairs and analytical writing — taught the way rankers actually learn them. By the time UPSC or KPSC becomes relevant, the student is years ahead.

Constitutional & civic literacy

Daily current affairs discipline

Analytical & essay writing

Exam-grade reasoning practice

FOR EVERY STUDENT

A foundation for purposeful living

Thinking skills, public speaking, general awareness and life skills that matter regardless of career path — equally for the student who becomes an engineer, a doctor or an entrepreneur.

Confident public speaking

Structured argument & debate

Awareness of the world at large

Leadership & life skills

Six modules. One thinking mind.

01 **Current Affairs & General Awareness**

Reading the news like an administrator: what happened, why it matters, what it connects to.

02 **Public Speaking & Debate**

Standing up, holding a position and defending it — with practice rounds every week.

03 **Think Lab — Applied Reasoning**

Open-ended problems with no textbook answer: cause and effect, trade-offs, consequences.

04 **Quant & Logic**

Numerical ability and logical reasoning, at a pace that strengthens school maths too.

05 **Quizzes & Drills**

Short, regular retrieval practice that turns knowledge into recall a student can trust.

06 **Officers & Toppers Talks**

Live conversations with serving officers and UPSC rankers — the signature module, overleaf.

Every module is taught live, in discussion — never as a recorded lecture playing to an empty room.

MODULE 06 — SIGNATURE

The people who lived it, in the room.

Direct conversations with serving IAS, IPS and IFS officers and UPSC rankers — real administrative experience and real exam strategy, straight from the people who lived it. Students come with questions; they leave with a picture of the work, not a poster of it.

Ask anything

Open Q&A — students put their own questions to the guest.

Strategy, first hand

How rankers actually read, revise and write under time.

A face to the goal

Ambition becomes concrete when it has a person attached.

A head start that outlasts the exam.

Thinking skills

Reasoning, structured argument, cause-and-effect analysis.

Communication

Public speaking, debate, and confident articulation.

General awareness

Current affairs and constitutional literacy, built early.

A 3–5 year head start

On UPSC, KPSC and every competitive exam ahead.

Stronger school grades

Gains that show up in Social Science, History, Civics and English.

Purposeful living

A foundation that matters, whichever path they choose.

Nothing here is wasted on the student who never sits the exam.

It fits around school, not against it.

No clash with school

Sessions sit outside school hours and pace down through board exam season — designed to reduce academic load, not add to it.

Fully online, any board

Live classes your child joins from home — CBSE, ICSE or State. No relocation, no coaching-centre commute.

No premature pressure

A foundation program, not an early cram course. Children are not asked to choose a career at thirteen — they are given what makes any later choice a better one.

Mentors you can reach

Enrolment begins with an orientation call with a named academic mentor, reachable through the year.

“ The question is not whether your child will clear an exam. It is how they will think when it matters.

Compass IAS Academy, Kozhikode.

IAS @ School is run by Compass IAS Academy — a civil services academy in Kozhikode, Kerala, whose faculty teach the same syllabus to adult UPSC aspirants every day. The school program is that experience, translated for younger students.

FACULTY

Mentors drawn from the academy's UPSC faculty, with guest officers and rankers.

METHOD

Live discussion, weekly retrieval practice, written work that is read and marked.

REACH

Based in Kozhikode, Kerala; delivered online to students across India.

PARENT CONTACT

A named mentor per student, reachable through the year for progress.

GETTING STARTED

01

Message us

A WhatsApp with your child's class is enough to begin.

02

Orientation call

A conversation with an academic mentor, with no obligation.

03

Join the cohort

Schedule and mentor assigned; live sessions start from home.
